Introduction

The 1998 Bibliography of Publications cites journal articles, books, book chapters, editorial letters, published abstracts, book reviews, and web sites published by 167 authors under the auspices of the University of North Texas Health Science Center at Fort Worth during the calendar year. The accuracy of references has been verified. This 1998 bibliography, containing 227 unique citations, provides a comprehensive listing of the publications of faculty, staff, and students; and an overview of their accomplishments and research interests. We have also included thirty-three citations from 1997 which were inadvertently omitted from last year's bibliography.

Entries are grouped by division, then by department, and arranged alphabetically by author within each department. For collaborative works, the entry is cited under each author. There are separate sections for students of the Graduate School of Biomedical Sciences, and Physician Assistant Studies. The format used to cite publications follows the style established by the National Library of Medicine.
