2. The amount of legislative appropriations to the agency for each fiscal year of the current state fiscal biennium:

3. The agency's methodology, including any employment market analysis, for determining the compensation of executive staff² employed by the agency, along with the name and position of the person who selected the methodology:

In an effort to recruit and retain high-performing Executive Staff members, UNTHSC seeks to provide market competitive salaries. The methodology utilized for salary determinations includes, but is not limited to, a review of comparable peer and market positions and salaries through the Chronicle of Higher Education, the College and University Professional Association of Human Resources (CUPA) database nationally, and the LBB Administrative Accountability Report data in Texas. The methodology used to determine salaries for Executive Staff members is determined by the University President. Dr. Michael Williams was President at the time the reported salaries were determined. Compensation for the UNTHSC President is determined by recommendation of the UNT System Chancellor and approval of the UNT System Board of Regents.

4. Whether executive staff are eligible for a salary supplement:

Executive Staff members are eligible for supplemental compensation either as stipulated by statutory authority, by contract provision, or for the performance of additional or interim responsibilities, in accordance with UNT System policies for supplemental payments.

5. The market average for compensation of similar executive staff in the private and public sectors:

The average compensation of University of North Texas Health Science Center Executive Staff is 10.13% lower than the 50th percentile of the CUPA and LBB data reflecting comparably sized institutions.

6. The average compensation paid to non-executive staff employed by the agency:
